ABOUT ME

I have over a year of hands-on experience in the cybersecurity industry, specializing in website, network, API, and mobile penetration testing. I thrive in collaborative environments, working closely with teams to identify and address vulnerabilities. I believe success is a collective effort, and I'm passionate about contributing to a secure digital landscape.

- InfoSec CTF 2023, N-COE With NASCOM & DSCI, Rank- 19

PROJECT

Subdomaindiver

It is a tool that helps you discover subdomains under a given target domain. The script is written in Bash, making it a lightweight and versatile tool. A bug bounty hunter or penetration tester can easily find subdomains on their target website with this tool.

TRAINING

- Ethical Hacking Training (1 Months), Prompt Infotech, Bangalore, April - 2022
